

This '**Media Handbook on WASH**' is a manual for Journalists on Water supply, Sanitation, and Hygiene (WASH) issues in Nigeria.

It contains basic information and facts on Nigeria's WASH profile, including state of access and coverage; Nigeria's hydrogeology including surface and groundwater resources, as well as the country's geological formation.

Other information in the Handbook include the institutional, policy, and legal framework for management of Nigeria's WASH sector; WASH milestones and meetings; and a glossary of major WASH terms.

The Handbook also features addresses of institutions in the WASH sector; and contacts of potential sources of news, including names of key individuals that may be able to provide Journalists essential WASH information or grant interviews.

The Handbook is intended to be an information start up for anyone interested in reporting Nigeria's WASH sector. It is generally aimed at improving the quality of reporting WASH issues in Nigeria.

It would be particularly useful for Journalists interested in reporting Nigeria's WASH sector, and other sectoral stakeholders.

The handbook is published by **Water and Sanitation Media Network**, with the support of **West Africa WASH Journalists Network**, **WaterAid in Nigeria**, and **Water Supply and Sanitation Collaborative Council**.
